

HAVAL H8

Pure Luxury meets Peak Performance

With its sleek lines, sumptuous interior and advanced power plants, the new Haval H8 luxury SUV makes a bold statement of stylish intent.

Personality with Flair

Purposeful yet smartly sophisticated, the Haval H8 is a perfect fusion of high specification function and elegant form.

Overseas Colour Shown, Not Available In Australia

High-sheen Chrome-plated Front Grille

The transverse design of the chrome-plated grille is bold and elegant. One look and you know you are driving something special.

Aluminium Alloy Wheels

Fashionable, strong and lightweight, aluminium alloys reduce unsprung weight and add a sophisticated elegance.

Stylish Lines and Finish

A blend of classic and contemporary design cues have influenced the styling of the Haval H8. Flowing from its transverse chrome grille and swept-back headlights and bonnet fins past the distinctively contoured doors, the effect is one of streamlined grace.

Intelligent Headlamp Technology

The super white xenon headlights feature dusk-sensing technology, while the LUX even self-cleans as necessary for both safety and energy conservation.

Multifunction Side Mirrors

Complete with integrated LED indicator panels, the side mirrors are electrically operated and heated to dispel early morning dew and frost.

Functional Elegance

Practical features such as roof rails, running boards and an electric tailgate on the LUX model have been integrated seamlessly into the design of the Haval H8.

Contoured Roof Rails

Adding flexibility in style, factory-fitted roof rails elegantly follow the contours of the roof.

Integrated Running Boards

Sporty and functional running boards feature an aluminium finish, complementing the high-sheen alloy wheels.

All-LED Tail Lamps

Bright, safe and energy-efficient, these tail lamps are entirely LED illuminated for maximum visibility and longevity.

Luxurious Interior

Spacious and ergonomically efficient, the Haval H8 interior boasts superior craftsmanship for ultimate driving comfort.

LUX Model shown

LUX Model shown

Spacious and Beautifully Styled

The generous proportions of the Haval H8 interior provide both driver and passengers with high levels of comfort.

A multi-level console and full colour instrument panel deliver a satisfyingly intuitive driving experience.

Genuine leather steering wheel and gear shift knob is combined with leather appointed seats in the LUX while the console adopts classical timber designs for added luxury.

① 2-screen seat-back DVD entertainment system is optional in the LUX.

② Leather-finished multifunction steering wheel

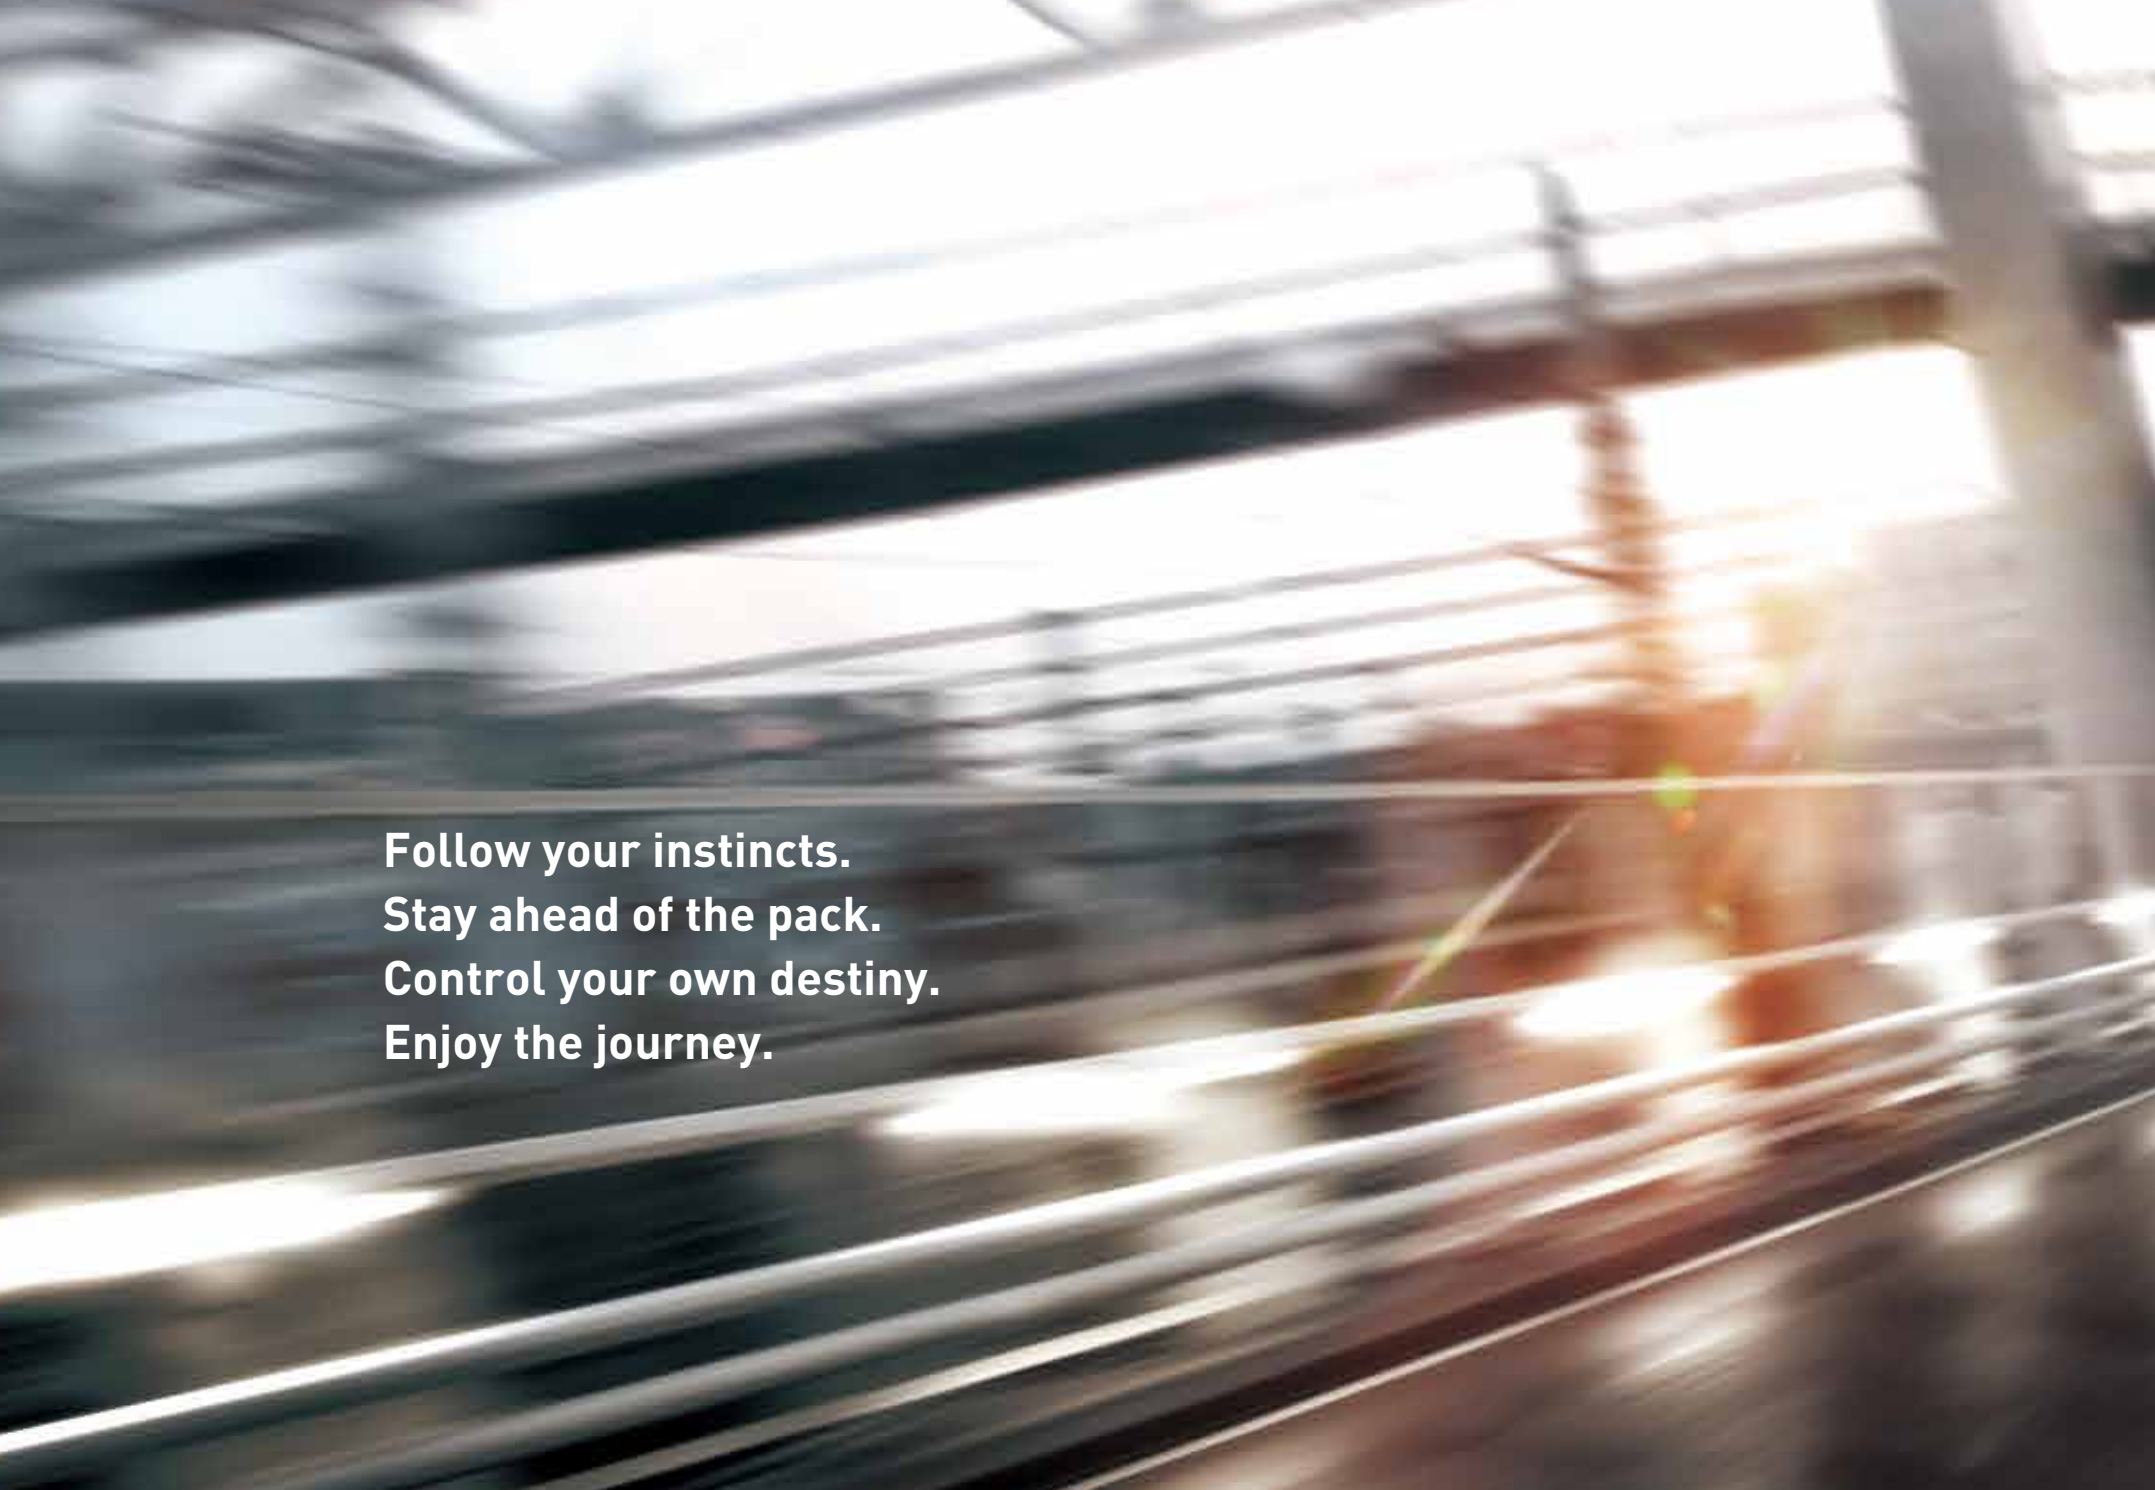

Sheer Therapeutic Ambience

Adjust the interior mood of the Haval H8 with a choice of red, blue or orange ambient lighting.

Enjoy the journey even more with high quality entertainment and the rich aroma of leather.

- ① Infinity 5.1 channel hi-fi system (LUX)
- ② Premium quality genuine leather appointed seats (LUX)
- ③ Full colour digital instrument panel
- ④ Touch-controlled reading lamp
- ⑤ Multi-level console

**Follow your instincts.
Stay ahead of the pack.
Control your own destiny.
Enjoy the journey.**

Exhilarating Performance

Take control with confidence via a powerful 2.0L turbo direct injection petrol engine.

Maximum rated power: 160kW at 5500rpm

Providing an exceptional driving experience.

Maximum torque: 324Nm at 2000rpm with high output to 4000rpm

Delivering great launch feel and acceleration when required.

Maximum power per litre: 80kW/L

Demonstrating strong power output with low fuel input.

Intelligent Technology

The integration of the latest intelligent technology into the Haval H8 ensures maximum comfort, safety and performance.

Double-wishbone Independent Front Suspension

The independent front suspension of this robust SUV features double wishbones that simultaneously absorb motion and transverse forces. High levels of rigidity maintain optimal tyre contact and keep the body stable during braking, accelerating and cornering. The upper and lower wishbones are unequal in length to alter camber angle during wheel articulation. This reduces tread variation and tyre wear, and delivers a smooth and comfortable driving experience for driver and passenger alike.

Multilink Independent Rear Suspension

This advanced and highly rated suspension system is becoming the worldwide industry standard for luxury SUVs. It meets the very high demands of off-road driving, while improving handling, supporting superior control and delivering outstanding comfort to driver and passengers.

Fully-responsive Intelligent Four-wheel Drive System

The Engine Control Unit of the Haval H8 uses real-time data (including vehicle speed, wheel speed and throttle position) and controllable torque to intuitively switch between two-wheel and four-wheel drive modes. Whatever the road conditions, the Haval H8 intelligently adapts to deliver optimum performance and maximum comfort.

Advantages of the Intelligent Four-wheel Drive System

- ① The controllable torque from the intelligent four-wheel drive system is transferred to all four wheels in direct response to any slip or steering issues. This greatly improves acceleration, stability and safety.
- ② Torque transferred to the front wheels in parking situations is low to ensure enhanced convenience and control.
- ③ Maximum traction and better acceleration are achieved by distributing power to all four wheels. When the vehicle is running at cruising speeds, torque delivery to the front wheels is reduced to improve fuel efficiency.
- ④ When on slippery roads, the Intelligent Four-wheel Drive System works together with the vehicle's other electronic safety systems to achieve optimum traction and safety performance.
- ⑤ When ABS is engaged, power delivery is regulated to maximise stability, even during emergency braking.
- ⑥ The system responds quickly in off-road conditions to ensure all four wheels deliver maximum traction efficiently.

ZF 6-speed Automatic Transmission with Sports Shift

Precision engineered for maximum driving performance

F1 Inspired Steering Wheel Gear Shift

Drivers can shift gears without taking their hands off the steering wheel, providing a real Formula 1 style gear-changing experience.

Manual/Automatic Switching

This enables smooth switching between automatic and manual modes, to match driving habits and accommodate road conditions.

Safety Locking Function

Enhancing driving safety, this feature prevents the gear shift being switched to the driving position accidentally.

Multiple Speed Gearbox

The six-speed gearbox with super-smooth gear shifting provides precise steps to improve fuel economy.

Cruise Control

This gives the driver's legs some rest on long journeys, and can help lower fuel consumption.

Three Driving Modes

ECO mode accurately controls transmission shifting to achieve the most economical fuel consumption.

SPORTS mode automatically delays transmission up-shift and advances down-shift time to provide drivers with stronger and more efficient power output.

SNOW mode automatically adjusts to a high-gear low-speed start mode to avoid slip when driving on snow or icy roads.

① ZF 6-speed Automatic Transmission with Sports Shift

② F1 Inspired Steering Wheel Gear Shift

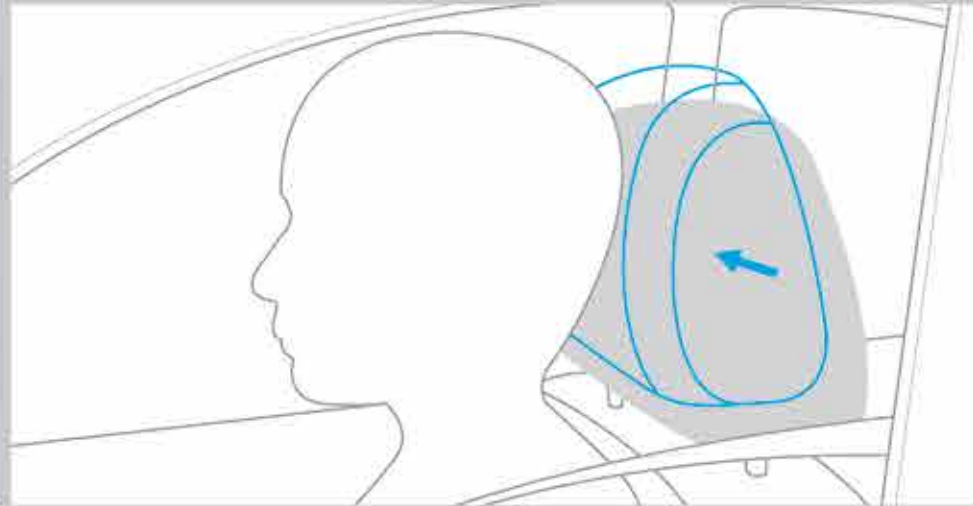

High Rigidity Safety Structure

By efficiently absorbing impact energy, the high rigidity safety structure helps protect the driver and passengers in the event of a collision.

TPMS (Tyre Pressure Monitoring System)

A significant safety feature, real-time monitoring quickly warns the driver of any loss of pressure or temperature changes in the tyres.

Front-row Active Headrest

In the event of a collision, the front-row headrests trigger a neck protection system that supports the head to help reduce whiplash or spinal injuries.

Multi-dimensional Air Bags

Front-row Double Air Bag

If a collision occurs, this air bag absorbs the impact energy and distributes it via a venting hole at the rear of the bag.

Front-row Side Air Bag

This air bag inflates at the moment of collision to absorb the impact energy, and help reduce injuries to the driver and front passenger .

Head Protecting Side Curtain Air Bag

If a collision from the side occurs, this air bag helps protect occupants in both front and rear seats.

Parking Assist

Real-time Reversing Camera

When in reverse gear, a high definition camera at the rear automatically displays the view behind on a liquid crystal screen with dynamic parking lines to increase safety and assist in parking.

Digital Reversing Radar

8 radar sensors, 4 in the front and 4 at the rear, increase parking safety by alerting the driver to close proximity obstacles.

Angular Adjusting Side Mirror

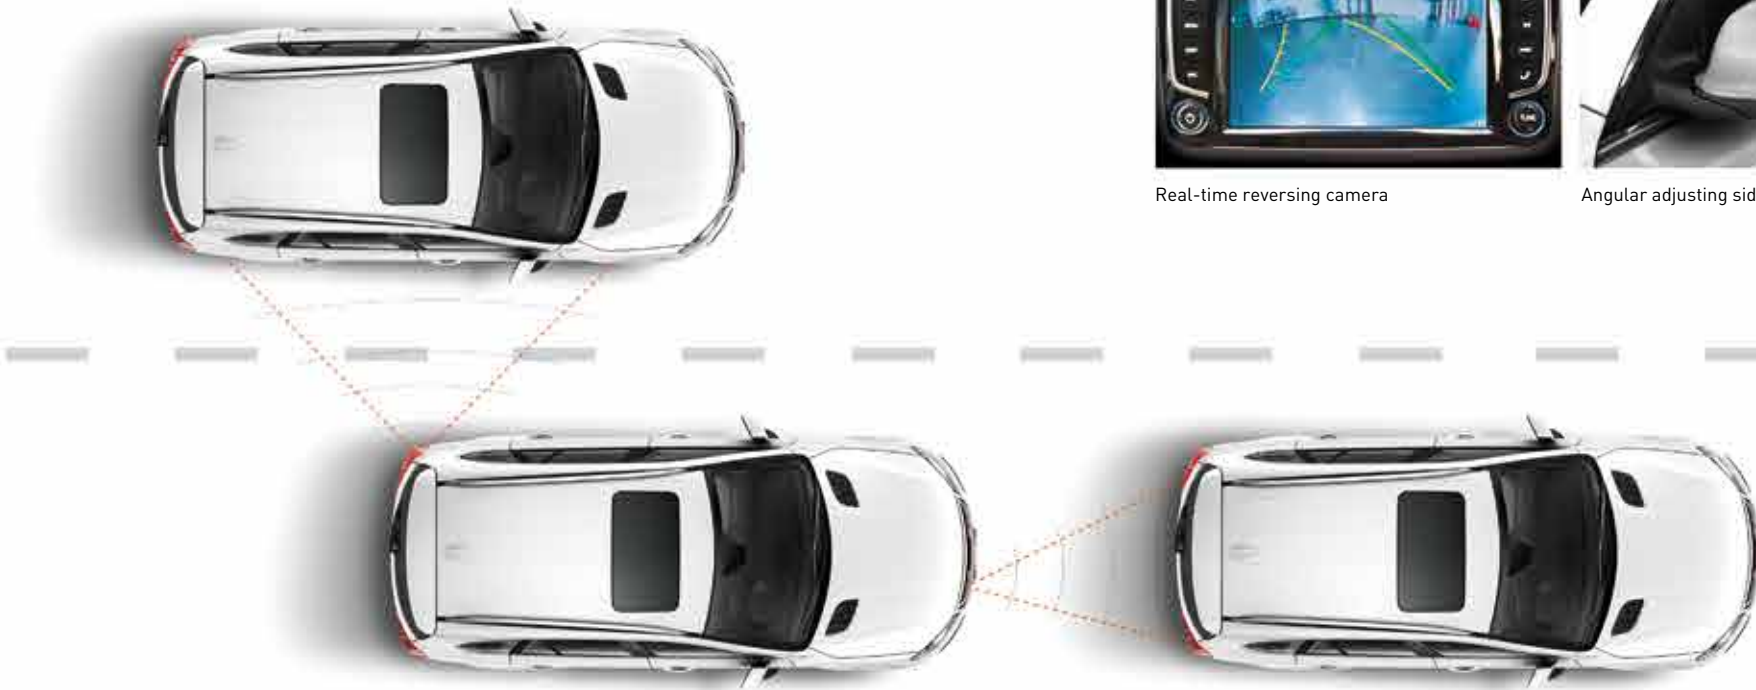

When reversing, the side mirror on the kerb side tilts down automatically to help the driver spot low obstacles to the side of the car.

Real-time reversing camera

Angular adjusting side mirror

Digital reversing radar

Infinity Integrated Entertainment System

NVH Ultra-silent Cabin

Noise reduction, panel insulation and noise absorption combine to deliver a whisper quiet ride in the H8 cabin.

Infinity 5.1 Channel Hi-fi System

This world-leading entertainment system boasts a Dolby Digital-supporting 5.1 channel amplifier plus 10 speakers for high quality audio impact.

Fully connected

An AUX IN/USB interface is built into the arm rest while the optional DVD player is discreetly and safely hidden beneath the seat. The display has USB and CVBS interfaces to keep you fully connected and entertained with maximum flexibility.

NVH ultra-silent cabin

Multiple media interfaces

Infinity 5.1 channel hi-fi system

AFS Intelligent Lighting System (LUX only)

① Speed-sensitive Lighting Assistance

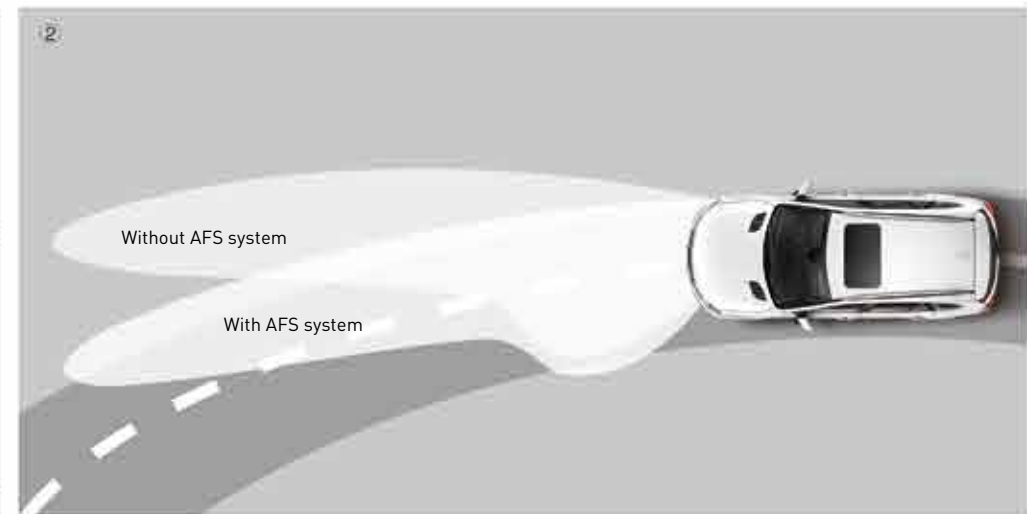

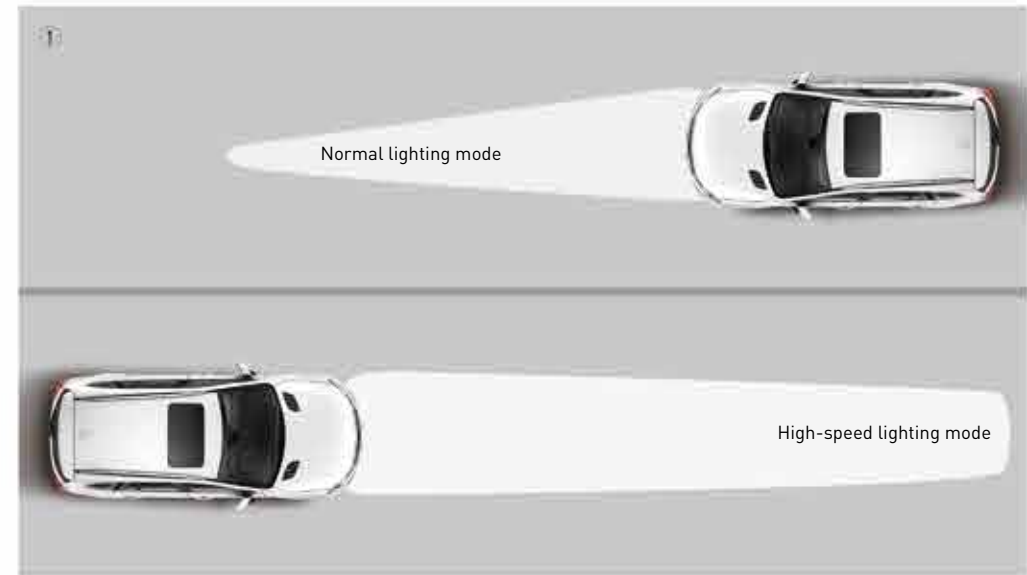

The speed-sensitive intelligent lighting mode keeps the beam broad at low speeds but extended at higher speed to improve visibility and safety.

② Directional Lighting Assistance

For safer cornering at speed, rotation-sensitive intelligent lighting senses the movement of the steering wheel and automatically adjusts the direction of the beam to illuminate around the curve, significantly improving driving safety.

③ Body Inclination Adjustment Assistance

If the inclination of the vehicle alters due to heavy loads, the intelligent lighting system automatically compensates, adjusting the angle of the beam to maintain optimum illumination.

ESP Bosch 9th Generation Electronic Assist System

A network of sensors monitors the vehicle's status and detects braking, to automatically engage features that provide a safer, simpler and more comfortable ride.

ESP (Electronic Stability Program)

Improving stability and safety, ESP helps maintain the vehicle's line and helps prevent skidding.

HDC (Hill Descent Control)

Hill Descent Control automatically regulates braking on all four wheels to deliver a smooth and stable descent for a safer drive.

HHC (Hill Hold Control)

HHC simplifies hill starts by holding the brakes for up to 2 seconds after removing your foot, to avoid slipping back while engaging the accelerator.

Other features: ABS (anti-lock braking system), EBD (electronic brake force distribution), HBA (hydraulic brake assist) and RMI (roll movement intervention).

HDC (Hill Descent Control)

ESP (Electronic Stability Program)

HHC (Hill Hold Control)

① Start stop button

⑥ Chrome-plated door handles

⑪ Multifunction control centre

⑯ Intelligent remote control

② Double-wishbone front suspension

⑦ Cruise Control

⑫ One-button electronic boot lift (LUX)

⑰ Useful rear-row storage space

③ Electro-chromatic rear-view mirror

⑧ Electric anti-pinch sunroof

⑬ Multi-way electric seat adjustment

⑱ Premium leather appointed seats (LUX)

④ Handy storage space in the front

⑨ 8" TFT colour liquid crystal touch screen

⑭ Digital reversing radar

⑲ Complementary dashboard colours

⑤ Keyless entry system

⑩ Trapezoid external expansion exhaust

⑮ Headlamp multifunction control system

⑳ Aluminium scuff plates

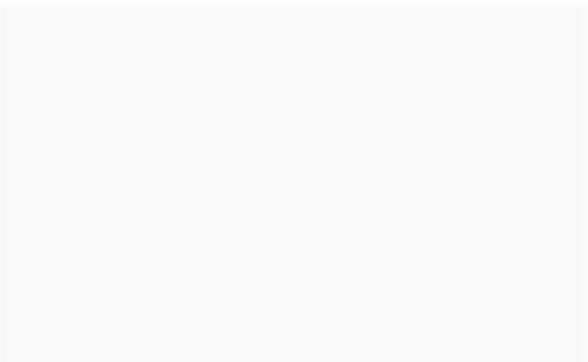

NIVOMAT Self-adapting Balance System

Rivalling air suspension, NIVOMAT uses dynamic stability technology to maintain the height and balance of the chassis under all load conditions, improving handling and control.
